

Move your desktop to the cloud

Managing and supporting your employee desktops and apps can be a great expense of time, resources, and money. **Moving your desktop to the cloud** can deliver the following benefits:

- No more desktop management headaches
- BYOD - Access desktop from virtually anywhere and on multiple devices
- Extended access to critical business apps
- Provides Business Continuity and Locked Down Security
- Savings of both time and money

Virtual Desktop Maximizes Flexibility

- Add (or reduce) users as needed.
- Access "the office" from virtually anywhere, at any time.
- Establishing a virtual office in "the cloud" minimizes the need for physical office space.

Virtual Desktop Maximizes Profits

- Fluctuating IT costs are replaced with a predictable fixed monthly subscription fee.
- Pursue special projects without the risk of committing capital to hardware and software.
- Procure plans based on business needs. For example, interns can utilize a Silver plan while power-users get Gold or Platinum.

Virtual Desktop Maximizes Reliability

- Daily backups are automated and stored safely at our top tier data centers.
- We maintain all software updates and patches.
- 24/7 monitoring and management of virtual IT infrastructure.

Virtual Desktop Maximizes Productivity

- Use your favorite full-featured office software packages, not browser-based knockoffs.
- Reap the benefits of the latest office software without wasting budget to update hardware.
- Minimize downtime due to weather or other adversities. Virtual desktop is the virtual office dream realized!
